Investing in India profitable: Putin says Russia will now 'Make in India', praises PM Modi's policies

Russia President Vladimir Putin informed that his country will soon set up manufacturing plants across India. He also praised Prime Minister Narendra Modi for his 'India-first' policies and 'Make in India' initiative. President Vladimir Putin believes that investing in India is "profitable" and announced that Russia is now ready to set up its manufacturing operation in India.

Putin also praised Prime Minister Narendra Modi for his "India-first" policy and the "Make in India" initiative. India's leadership focused on prioritising national interests.

Addressing the 15th VTB Russia Calling Investment Forum, Putin said that under the leadership of PM Modi, the Indian government has been creating stable conditions for growth and development.

The Russian President also emphasised that India's leadership has focused on prioritising its national interests.

"We are also ready to set up our manufacturing operations in India. The Indian government, under the Prime Minister's leadership, has been creating stable conditions, driven by a policy of putting India first. We believe that investing in India is profitable," Putin said, adding that Russian company Rosneft has already invested \$20 billion in India.

Can Indian Parliament do what South Korean Parliament did on martial law?

India's Constitution allows for three types of emergencies: National Emergency, State Emergency (President's Rule), and Financial Emergency. A National Emergency, like the one imposed by Indira Gandhi in 1975, can now only be declared for war, external aggression, or armed rebellion, following stricter guidelines established by the 44th Amendment. The proclamation requires a written request from the Cabinet, approval by Parliament within one month, and subsequent extensions every six months through special majority resolutions. Key democratic safeguards include the judiciary's ability to protect fundamental rights like the Right to Life (Article 21) and the Right to Equality (Article 14), even during emergencies. The 44th Amendment also replaced "internal disturbance" with "armed rebellion" as a valid reason for Emergency, significantly limiting executive overreach and ensuring tighter checks and balances.

Donald Trump picks Indian-American Kash Patel as new FBI director

US President-elect Donald Trump on Saturday announced that he has nominated Kashyap 'Kash' Patel to lead the Federal Bureau of Investigation (FBI). Kash Patel, who has been an ally and former US defence department chief of staff in the first Trump administration, is an Indian-American and is widely known as a Trump loyalist.

In a post on his social media platform Truth Social, Trump said, "I am proud to announce that Kashyap 'Kash' Patel will serve as the next Director of the Federal Bureau of Investigation. Kash is a brilliant lawyer, investigator, and 'America First' fighter who has spent his career exposing corruption, defending Justice, and protecting the American People."

RBI cuts CRR, keeps Repo rate unchanged: here's why

The RBI's Monetary Policy Committee (MPC) cut the cash reserve ratio (CRR) by 50 basis points to 4% to boost liquidity, releasing ₹1.16 lakh crore into the banking system. However, the Repo rate was kept unchanged at 6.5% for the 11th consecutive meeting. The CRR cut is expected to enhance banks' lending capacity and economic growth, while stable Repo rates offer relief to borrowers as EMIs remain unaffected.

The MPC revised the GDP growth forecast for FY25 down to 6.6% from 7.2% and raised the inflation projection to 4.8% due to persistent food inflation and economic slowdown. Governor Shaktikanta Das emphasized the importance of price stability for durable growth, with recent GDP figures showing a slump to 5.4% in Q2 FY25, driven by weaker demand and higher inflation.

O2 Power Partners With East Central Railways For 100 MW Green Energy PPA.

O2 Power has signed a 100 MW Power Purchase Agreement (PPA) with East Central Railways (ECR) to supply renewable energy from its facilities in Rajasthan, Gujarat, and Karnataka. This partnership supports ECR’s decarbonization efforts and Indian Railways’ goal of achieving net-zero carbon emissions by 2070. The renewable energy will power ECR’s operations, reducing its carbon footprint.

O2 Power, with a renewable energy portfolio exceeding 6 GW, plays a key role in India’s transition to green energy, contributing to the national target of 500 GW of non-fossil fuel capacity by 2030. The agreement also aligns with Indian Railways’ push towards sustainable energy use.

Trump’s 100% tariff threat unrealistic, India must focus on local currency trading: GTRI

US President-elect Donald Trump’s statement to BRICS countries to impose 100% customs duties if the group would replace the US dollar is unrealistic, and India should focus on developing a workable local currency trading system, think tank GTRI said Sunday. said that the tariffs of this scale would harm the American consumers only as it would push prices on imports, disrupt global trade, and risk retaliation from key trading partners.

“Trump’s threat to impose 100% tariffs on countries adopting a BRICS currency is unrealistic and more symbolic than practical. For India, the prudent approach is to focus on making local currency trading workable by establishing a transparent and open currency exchange,” said

India successfully tests K-4 submarine-launched nuclear missile from INS Arighaat

India has successfully tested its nuclear-capable K-4 submarine-launched ballistic missile (SLBM) from the INS Arighaat, a 6,000-tonne nuclear-powered submarine commissioned in August 2024. The K-4, with a strike range of 3,500 km, was launched in the Bay of Bengal off Visakhapatnam. This marks the missile’s first operational test from a submarine, showcasing India’s capability to deploy second-strike deterrence through its nuclear triad. The test underscores India’s advancements in indigenous defense technology, enhancing its strategic posture amid regional tensions. By integrating the K-4 with its submarine fleet, India strengthens its stealthy and survivable deterrence capabilities, reinforcing its no-first-use nuclear doctrine and credible minimum deterrence policy.

STEVE JOBS

Former CEO of Apple

Steve Jobs (1955–2011) was a visionary entrepreneur and co-founder of Apple Inc., renowned for revolutionizing the technology industry. Born in San Francisco, California, and adopted shortly afterward, Jobs grew up in the Silicon Valley area. After dropping out of college, he founded Apple in 1976 with Steve Wozniak and Ronald Wayne, and they introduced the Apple I computer. The company's first major success came with the Apple II, followed by the iconic Macintosh in 1984.

Jobs was known for his creativity and demanding perfectionism, driving Apple to develop innovative products like the iPod, iPhone, and iPad, which transformed the personal computing, music, and telecommunications industries. He was also a major force behind the development of Pixar Animation Studios, which later merged with Disney.

After being ousted from Apple in 1985, Jobs founded NeXT, a computer company that focused on higher-end workstations, and acquired Pixar. He returned to Apple in 1997, rescuing the company from near bankruptcy with groundbreaking innovations and a focus on sleek, user-friendly designs. Jobs' leadership style combined a keen eye for design, a strong vision of the future, and an ability to inspire and push his teams to achieve what many thought impossible.

Jobs was diagnosed with a rare form of pancreatic cancer in 2004, and despite his illness, he continued to lead Apple until his resignation as CEO in August 2011. He passed away on October 5, 2011. His legacy lives on through Apple's continued success and his profound influence on technology and design.
